Document Purpose

The purpose of this document is to identify the requirements for maintenance and support of the Hospital Compare Downloadable Databases, which can be found by clicking the following link: <https://data.medicare.gov>.

Background

Hospital Compare was created as a result of the Hospital Quality Initiative through the efforts of the Centers for Medicare and Medicaid Services (CMS) and the Hospital Quality Alliance (HQA). The HQA was a public-private collaboration established in December 2002 to promote data collection and public reporting on hospital quality of care. The HQA consisted of organizations that represented consumers, payers, hospitals, clinicians, accrediting organizations, federal agencies, and other stakeholders. The HQA effort was intended to help consumers make informed health care decisions and to support efforts to improve quality in U.S. hospitals. The HQA disbanded in December 2011, and CMS currently maintains the Hospital Compare Web site.

Hospital Compare is a tool that provides valid, credible, and user-friendly information about the quality of care delivered in the nation's acute care, critical access, VA, and Children's hospitals. This information can help consumers make informed decisions about health care. Hospital Compare allows consumers to select multiple hospitals and directly compare performance measure information related to acute myocardial infarction (AMI), heart failure (HF), pneumonia (PN), surgery, and other conditions. See [Appendix A](#) for a full list of the Hospital Compare measures. These results are organized by:

- Patient Survey Results
- Timely and Effective Care (Process of Care) measures
- Readmissions, Complications, and Deaths
- Use of Medical Imaging
- Medicare Payment
- Number of Medicare Patients Treated
- Linking Quality to Payment
 - Hospital Readmissions Reduction
 - Hospital Value-Based Purchasing

To access the Hospital Compare Web site, please visit www.medicare.gov/hospitalcompare.

Hospital Compare Measures Description/Background and Reporting Cycles

Data is collected in differing timeframes from the various quality measurement contractors. Below is a brief description of the collection process and report timing for each measure set.

Name	Structural Measures
Description/ Background	A Structural measure reflects the environment in which providers care for patients. For example, whether or not a hospital uses an electronic health record is a Structural measure. Hospitals submit Structural measure data using an online data entry tool made available to hospitals and their vendors.
Reporting Cycle	The collection period for the Structural measures is 12 months. The Structural measures are typically refreshed annually.

Name	Timely and Effective Care
Description/ Background	The measures of Timely and Effective Care measure the percentage of hospital patients who receive treatments known to get the best results for certain common, serious medical conditions or surgical procedures, and how quickly hospitals treat patients who come to the hospital with certain medical emergencies. The measures only apply to patients for whom the recommended treatment would be appropriate. The measures of Timely and Effective Care apply to adults and children treated at hospitals paid under the Inpatient Prospective Payment System (IPPS) or the Outpatient Prospective Payment System (OPPS) or those that voluntarily report data on measures for whom the recommended treatments would be appropriate, including Medicare patients, Medicare managed care patients, and non-Medicare patients.
Reporting Cycle	The collection period for the Timely and Effective Care measures is generally 12 months. The Timely and Effective Care measures are typically refreshed quarterly, based on a rolling four quarters.

Name	30-Day Mortality and Readmission Measures
Description/ Background	The risk-standardized AMI, HF, and PN 30-Day Mortality and Readmission measures were developed by a team of clinical and statistical experts from Yale and Harvard universities, using a methodology that has been published in peer reviewed literature. The measures comply with standards for publicly reported outcomes models set forth by the American Heart Association and the American College of Cardiology. CMS calculates hospital-specific 30-day mortality and readmission rates using Medicare claims and eligibility information as well as VA administrative information. Using administrative data makes it possible to calculate mortality and readmission rates without performing medical chart reviews or requiring hospitals to report additional information to CMS. To make comparisons between hospitals fair, calculation of the 30-Day Mortality and Readmission measures adjust for patient characteristics that may make death or readmission more likely, even if the hospital provided quality care—including the patient’s age, gender, past medical history, and other diseases or conditions (comorbidities) the patient had at hospital arrival that are known to increase the patient’s risk of dying or readmission.
Reporting Cycle	The collection period for the 30-Day Mortality and Readmission measures is 36 months. The 30-Day Mortality and Readmission measures for AMI, HF, and PN are produced from Medicare claims and enrollment data. The 30-Day Mortality and Readmission measures are typically refreshed annually.

Name	AHRQ Patient Safety Indicators (PSIs)
Description/ Background	The AHRQ PSIs reflect quality of care for hospitalized adults and focus on potentially avoidable complications and iatrogenic events. CMS currently publicly reports six PSI measures.
Reporting Cycle	The collection period for the PSIs is 24 months. The PSI measures are typically refreshed annually.

Name	Healthcare-Associated Infections (HAIs)
Description/ Background	HAIs are among the leading causes of death in the United States. HAIs put the patient at risk for serious injury, morbidity, mortality, increase the days of hospitalization required for patients, and add to healthcare costs. HAIs are largely preventable using widely publicized guidelines and interventions, such as better hygiene and advanced scientifically tested techniques. HAI measure data are collected by the Centers for Disease Control and Prevention (CDC) via the National Healthcare Safety Network (NHSN) tool. Hospitals must enroll and complete NHSN training to comply with CMS' IQR Program HAI requirements.
Reporting Cycle	The collection period for the HAI measures is 12 months. The HAI measures are typically refreshed quarterly, based on a rolling four quarters.

Name	Outpatient Imaging Efficiency
Description/ Background	CMS has adopted six measures (OP-8 through OP-11, OP-13, and OP-14) which capture the quality of outpatient care in the area of imaging. CMS notes that the purpose of these measures is to promote high-quality efficient care. Each of the measures currently utilize both the Hospital OPPS claims and Physician Part B claims in the calculations. These calculations are based on the administrative claims of the Medicare fee-for-service population and no additional data submission is required by hospitals.
Reporting Cycle	The collection period for the Outpatient Imaging Efficiency measures is 12 months. The Outpatient Imaging Efficiency measures are typically refreshed annually.

Name	Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) Patient Survey
Description/ Background	The HCAHPS Patient Survey is a 32-item survey instrument and data collection methodology for measuring patients' perceptions of their hospital experience. The survey is administered to a random sample of adult inpatients between 48 hours and six weeks after discharge. Six summary measures, two individual items, and two global items are publicly reported on the Hospital Compare Web site for each participating hospital. The six composites summarize how well nurses and doctors communicate with patients, how responsive hospital staff are to patients' needs, how well hospital staff help patients manage pain, how well the staff communicates with patients about medicines, and whether key information is provided at discharge. The two individual items address the cleanliness and quietness of patients' rooms, while the two global items report patients' overall rating of the hospital, and whether they would recommend the hospital to family and friends. The new Care Transitions composite will be publicly reported in late 2014. See Appendix B for a full list of HCAHPS Survey items and response options questions. More information about the HCAHPS Survey can be found in the official HCAHPS Online Web site, www.HCAHPSonline.org .
Reporting Cycle	The collection period for the HCAHPS measures is 12 months. The HCAHPS measures are typically refreshed quarterly.

Name	Number of Medicare Patients and Medicare Payment
Description/ Background	The payment and volume information reflects inpatient hospital services provided by hospitals to Medicare beneficiaries. CMS has posted this information for the public to view the cost to the Medicare program of treating beneficiaries with certain illnesses in their community and the number of Medicare patients treated. Payment and volume information can provide users with a general overview of hospitals' experience with Medicare Severity Diagnosis Related Groups (MS-DRGs). MS-DRGs are payment groups of patients who have similar clinical characteristics and similar costs. The median payment refers to the midpoint of all payments to the hospital for a particular MS-DRG, that is, half the payments were lower and half the payments were higher than the median payment.
Reporting Cycle	The collection period for the Number of Medicare Patients and Medicare Payment measures is 12 months. The Number of Medicare Patients and Medicare Payment measures are typically refreshed annually.

Name	Hospital Readmissions Reduction Program
Description/ Background	In October 2012, CMS began reducing Medicare payments for IPPS hospitals with excess readmissions. Excess readmissions are measured using a ratio, by dividing a hospital's number of "predicted" 30-day readmissions for AMI, HF, and PN by the number that would be "expected," based on an average hospital with similar patients. A ratio greater than one indicates excess readmissions. The calculations include only acute care hospitals paid under IPPS and Maryland hospitals.
Reporting Cycle	The collection period for the Hospital Readmissions Reduction Program is 36 months. The Hospital Readmissions Reduction Program measures are typically refreshed annually.

Name	Hospital Value-Based Purchasing (HVBP)
Description/ Background	The HVBP program is part of CMS' long-standing effort to link Medicare's payment system to quality. The program implements value-based purchasing to the payment system that accounts for the largest share of Medicare spending, affecting payment for inpatient stays in over 3,500 hospitals across the country. Hospitals are paid for inpatient acute care services based on the quality of care, not just quantity of the services they provide. For the first FY of the HVBP Program, two domains will be used to assess hospital performance: 1) Patient Experience of Care and 2) Clinical Process of Care. The Patient Experience of Care domain is comprised of the HCAHPS Survey measures. The Clinical Process of Care domain is comprised of selected IQR Program's Process of Care measures from the AMI, HAI, HF, PN, and Surgical Care Improvement Project (SCIP) measure sets. A performance score and an improvement score are calculated for each measure, a domain score is then calculated for each of the two domains. The Total Performance Score (TPS) is calculated using the weighted domain scores. For FY 2013 the Clinical Process of Care domain score is weighted as 70 percent of the TPS, and the Patient Experience of Care domain is weighted as 30 percent of the TPS.
Reporting Cycle	The collection period for HVBP measures is 12 months. The HVBP measures are typically refreshed annually.

Name	Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program
Description/ Background	The IPFQR program is a pay-for-reporting program intended to provide consumers with quality of care information to make more informed decisions about health care options. To meet the IPFQR program requirements, Inpatient Psychiatric Facilities (IPFs) are required to submit all quality measures to CMS. The IPFQR program measures allow consumers to find and compare the quality of care given at psychiatric facilities where patients are admitted as inpatients. Inpatient psychiatric facilities are required to report data on these measures. Facilities that are eligible for this program may have their Medicare payments reduced if they do not report.
Reporting Cycle	The collection period for the IPFQR measures is currently 6 months. The IPFQR measures are typically refreshed annually.

Data Collection Period Information

The Downloadable Databases are refreshed within 24 hours of the Hospital Compare data update as indicated in the bottom left corner of the Hospital Compare home page. For more information, there is a file that provides the measurement dates for each of the measure types being reported in that file. A sample of the measurement date file is shown below:

Measure Code	Measure Start Quarter	Measure Start Date	Measure End Quarter	Measure End Date
AMI-10	2Q2011	4/1/2011	1Q2012	3/31/2012
AMI-2	2Q2011	4/1/2011	1Q2012	3/31/2012
AMI-7a	2Q2011	4/1/2011	1Q2012	3/31/2012

When looking at the Access table, the following acronyms tell the type of data reported in a given table.

Acronym	Meaning
FTNT	Footnote
HCAHPS	Hospital Consumer Assessment of Healthcare Providers and Systems
IMG	Imaging
IMM	Immunizations
MSR	Measure
READM	Readmissions
MPV	Medicare Payments and Volume
SPP	Spending Per Patient

CSV Revised Flat Files Data Content Summary

Note: Opening CSV files in Excel will remove leading zeros from data fields. Since some data, such as provider numbers, contain leading zeros, it is recommended that you open CSV files using text editor programs such as Notepad to copy or view CSV file content. Fields having the data type of “memo” do not require a length. They allow the user to input large amounts of text without limit. Fields having the data type of “Text” require the corresponding length provided. Please note, the Revised CSV Flat File column names and file names should mirror Data.Medicare.gov.

Appendix A – Hospital Compare Measures

The tables below display the location of measures within the corresponding Access table and CSV Revised File.²

Access	dbo_vwHQI_HOSP_HCAHPS_MSR
CSV	HCAHPS Measures
Measure ID	Measure Name
HCAHPS	Patients who reported that their nurses "Always" communicated well
	Patients who reported that their doctors "Always" communicated well
	Patients who reported that they "Always" received help as soon as they wanted
	Patients who reported that their pain was "Always" well controlled
	Patients who reported that staff "Always" explained about medicines before giving it to them
	Patients who reported that their room and bathroom were "Always" clean
	Patients who reported that the area around their room was "Always" quiet at night
	Patients at each hospital who reported that YES, they were given information about what to do during their recovery at home
	Patients who gave their hospital a rating of 9 or 10 on a scale from 0 (lowest) to 10 (highest)
	Patients who reported YES, they would definitely recommend the hospital

Access	dbo_vwHQI_HOSP_MSR_XWLK
CSV	Process of Care Measures - Heart Failure
Measure ID	Measure Name
HF-1	Heart failure patients given discharge Instructions
HF-2	Heart failure patients given an evaluation of left ventricular systolic (LVS) function
HF-3	Heart failure patients given ACE inhibitor or ARB for left ventricular systolic dysfunction (LVSD)

Access	dbo_vwHQI_HOSP_MSR_XWLK
CSV	Process of Care Measures - Pregnancy and Delivery Care
Measure ID	Measure Name
PC-01	Percent of newborns whose deliveries were scheduled too early (1-3 weeks early), when a scheduled delivery was not medically necessary

Access	dbo_vwHQI_HOSP_MSR_XWLK
CSV	Process of Care Measures - Pneumonia
Measure ID	Measure Name
PN-3b	Pneumonia patients whose initial emergency room blood culture was performed prior to the administration of the first hospital dose of antibiotics
PN-6	Pneumonia patients given the most appropriate initial antibiotic(s)

Access	dbo_vwHQI_HOSP_IMM
CSV	Immunization
Measure ID	Measure Name
IMM-2	Patients assessed and given influenza vaccination
IMM-1a	Patients assessed and given pneumonia vaccination

² Please note, the Revised CSV Flat File names should mirror Data.Medicare.gov.

Access	vwHQL_HOSP_SPP
CSV	Medicare Spending Per Patient
Measure ID	Measure Name
Medicare Spending	Spending per hospital patient with Medicare

Access	dbo_vwHQL_HOSP_MSR_XWLK
CSV	Process of Care Measures - SCIP
Measure ID	Measure Name
OP-6	Outpatients having surgery who got an antibiotic at the right time - within one hour before surgery
SCIP-Inf-1a	Surgery patients who were given an antibiotic at the right time (within one hour before surgery) to help prevent infection
SCIP-Inf-3a	Surgery patients whose preventive antibiotics were stopped at the right time (within 24 hours after surgery)
OP-7	Outpatients having surgery who got the right kind of antibiotic
SCIP-Card-2	Surgery patients who were taking heart drugs called beta blockers before coming to the hospital, who were kept on the beta blockers during the period just before and after their surgery
SCIP-Inf-2a	Surgery patients who were given the right kind of antibiotic to help prevent infection
SCIP-Inf-4	Heart surgery patients whose blood sugar (blood glucose) is kept under good control in the days right after surgery
SCIP-Inf-9	Surgery patients whose urinary catheters were removed on the first or second day after surgery
SCIP-Inf-10	Patients having surgery who were actively warmed in the operating room or whose body temperature was near normal by the end of surgery

Access	dbo_vwHQL_HOSP_ED
CSV	Emergency Department Throughput
Measure ID	Measure Name
ED-1b	Average time patients spent in the emergency department, before they were admitted to the hospital as an inpatient
ED-2b	Average time patients spent in the emergency department, after the doctor decided to admit them as an inpatient before leaving the emergency department for their inpatient room
OP-18b	Average time patients spent in the emergency department before being sent home
OP-20	Average time patients spent in the emergency department before they were seen by a healthcare professional
OP-21	Average time patients who came to the emergency department with broken bones had to wait before receiving pain medication.
OP-22	Percentage of patients who left the emergency department before being seen
OP-23	Percentage of patients who came to the emergency department with stroke symptoms who received brain scan results within 45 minutes of arrival

Access	dbo_vwHQL_HOSP_MSR_XWLK
CSV	Process of Care Measures - Children
Measure ID	Measure Name
CAC-1	Children who received reliever medication while hospitalized for asthma
CAC-2	Children who received systemic corticosteroid medication (oral and iv medication that reduces inflammation and controls symptoms) while hospitalized for asthma
CAC-3	Children and their caregivers who received a home management plan of care document while hospitalized for asthma

Access	dbo_vwHQL_HOSP_MPV_MSR
CSV	Medicare Volume Measures
Measure ID	Measure Name
Medicare Volume	Number of Medicare patients treated for selected procedures

Access	vwHQI_HOSP_AHRQ
CSV	Agency for Healthcare Research and Quality
Measure ID	Measure Name
PSI-90	Serious complications (This is a 'composite' or summary measure)
PSI-4	Deaths among patients with serious treatable complications after surgery
PSI-6	Collapsed lung due to medical treatment
PSI-12	Serious blood clots after surgery
PSI-14	A wound that splits open after surgery on the abdomen or pelvis
PSI-15	Accidental cuts and tears from medical treatment

Access	dbo_vwHQI_HOSP_STRUCTURAL_XWLK
CSV	Hospital Structural Measures
Measure ID	Measure Name
SM_PART_CARD	Participates in: Cardiac surgery registry
SM_PART_STROKE	Participates in: Stroke care registry
SM_PART_NURSE	Participates in: Nursing care registry
SM_PART_GEN_SURG	Participation in General surgery registry
ACS_REGISTRY	Participates in: Multispecialty surgical registry
OP-12	Able to receive lab results electronically
OP-17	Able to track patients' lab, tests, and referrals electronically between visits

Access	vwHQI_HOSP_HAI
CSV	Healthcare Associated Infections
Measure ID	Measure Name
HAI-1	Central line- associated bloodstream infection (CLABSI)
HAI-2	Catheter- associated urinary tract infection (CAUTI)
HAI-3	Surgical site infections from colon surgery (SSI: Colon)
HAI-4	Surgical site infections from abdominal hysterectomy (SSI: Hysterectomy)
HAI-5	Methicillin-resistant Staphylococcus Aureus (or MRSA) blood infections (Antibiotic-resistant blood infections)
HAI-6	Clostridium difficile (or C.diff.) infections (Intestinal infections)

Access	dbo_vwHQI_HOSP_IMG_XWLK
CSV	Outpatient Imaging Efficiency Measures
Measure ID	Measure Name
OP-8	Outpatients with low back pain who had an MRI without trying recommended treatments first, such as physical therapy
OP-9	Outpatients who had a follow-up mammogram, ultrasound, or MRI of the breast within 45 days after a screening mammogram
OP-11	Outpatient CT scans of the chest that were "combination" (double) scans
OP-10	Outpatient CT scans of the abdomen that were "combination" (double) scans
OP-13	Outpatients who got cardiac imaging stress tests before low-risk outpatient surgery
OP-14	Outpatients with brain CT scans who got a sinus CT scan at the same time

Access	dbo_vwHQI_HOSP_MSR_XWLK
CSV	Process of Care Measures - Heart Attack
Measure ID	Measure Name
OP-3b	Average number of minutes before outpatients with chest pain or possible heart attack who needed specialized care were transferred to another hospital
OP-5	Average number of minutes before outpatients with chest pain or possible heart attack got an ECG
OP-2	Outpatients with chest pain or possible heart attack who got drugs to break up blood clots within 30 minutes of arrival
OP-4	Outpatients with chest pain or possible heart attack who got aspirin within 24 hours of arrival
AMI-7a	Heart attack patients given fibrinolytic medication within 30 minutes of arrival
AMI-8a	Heart attack patients given PCI within 90 minutes of arrival
AMI-2	Heart attack patients given aspirin at discharge
AMI-10	Heart attack patients given a prescription for a statin at discharge
OP-1	Median time to Fibrinolysis (Data will be not be posted on Hospital Compare but will be available on Data.Medicare.Gov)

Access	dbo_vwHQI_HOSP_MSR_XWLK
CSV	Process of Care Measures - Stroke Care
Measure ID	Measure Name
STK-1	Ischemic or hemorrhagic stroke patients who received treatment to keep blood clots from forming anywhere in the body within 2 days of arriving at the hospital
STK-2	Ischemic stroke patients who received a prescription for medicine known to prevent complications caused by blood clots before discharge
STK-3	Ischemic stroke patients with a type of irregular heartbeat who were given a prescription for a blood thinner at discharge
STK-4	Ischemic stroke patients who got medicine to break up a blood clot within 3 hours after symptoms started
STK-5	Ischemic stroke patients who received medicine known to prevent complications caused by blood clots within 2 days of arriving at the hospital
STK-6	Ischemic stroke patients needing medicine to lower cholesterol, who were given a prescription for this medicine before discharge
STK-8	Ischemic or hemorrhagic stroke patients or caregivers who received written educational materials about stroke care and prevention during the hospital stay
STK-10	Ischemic or hemorrhagic stroke patients who were evaluated for rehabilitation services

Access	dbo_vwHQI_HOSP_MSR_XWLK
CSV	Process of Care Measures - Blood Clot Prevention and Treatment
Measure ID	Measure Name
VTE-1	Patients who got treatment to prevent blood clots on the day of or day after hospital admission or surgery
VTE-2	Patients who got treatment to prevent blood clots on the day of or day after being admitted to the intensive care unit (ICU)
VTE-3	Patients with blood clots who got the recommended treatment, which includes using two different blood thinner medicines at the same time
VTE-4	Patients with blood clots who were treated with an intravenous blood thinner, and then were checked to determine if the blood thinner was putting the patient at an increased risk of bleeding
VTE-5	Patients with blood clots who were discharged on a blood thinner medicine and received written instructions about that medicine
VTE-6	Patients who developed a blood clot while in the hospital who did not get treatment that could have prevented it

Access	HOSPITAL_QUARTERLY_QUALITYMEASURE_IPFQR_HOSPITAL
CSV	HOSPITAL_QUARTERLY_QUALITYMEASURE_IPFQR_HOSPITAL

HBIPS-4	Patients Discharged on Multiple Antipsychotic Medications
HBIPS-5	Patients Discharged on Multiple Antipsychotic Medications with Appropriate Justification
HBIPS-6	Post Discharge Continuing Care Plan Created
HBIPS-7	Post Discharge Continuing Care Plan Transmitted to Next Level of Care Provider Upon Discharge

Access	dbo_vwHQI_HOSP_MORTALITY_READM_XWLK
CSV	Outcome Of Care Measures
Measure ID	Measure Name
READM-30-AMI	Rate of readmission for heart attack patients
MORT-30-AMI	Death rate for heart attack patients
READM-30-HF	Rate of readmission for heart failure patients
MORT-30-HF	Death rate for heart failure patients
READM-30-PN	Rate of readmission for pneumonia patients
MORT-30-PN	Death rate for pneumonia patients
READM-30-HIP-KNEE	Rate of readmission after hip/knee surgery
READM-30-HOSP-WIDE	Rate of readmission after discharge from hospital (hospital-wide)
COMP-HIP-KNEE	Rate of complications for hip/knee replacement patients

Appendix B – HCAHPS Survey Question Listing

Composite Topics

- Nurse Communication (Questions 1, 2, 3)
- Doctor Communication (Questions 5, 6, 7)
- Responsiveness of Hospital Staff (Questions 4, 11)
- Pain Management (Questions 13, 14)
- Communication About Medicines (Questions 16, 17)
- Discharge Information (Questions 19, 20)

Individual Topics

- Cleanliness of Hospital Environment (Question 8)
- Quietness of Hospital Environment (Question 9)

Overall Ratings

- Overall Rating of Hospital (Question 21)
- Willingness to Recommend Hospital (Question 22)

#	Question
Q1	During this hospital stay how often did nurses treat you with courtesy and respect?
Q2	During this hospital stay how often did nurses listen carefully to you?
Q3	During this hospital stay how often did nurses explain things in a way you could understand?
Q4	During this hospital stay, after you pressed the call button, how often did you get help as soon as you wanted it?
Q5	During this hospital stay, how often did doctors treat you with courtesy and respect?
Q6	During this hospital stay, how often did doctors listen carefully to you?
Q7	During this hospital stay, how often did doctors explain things in a way you could understand?
Q8	During this hospital stay, how often were your room and bathroom kept clean?
Q9	During this hospital stay, how often was the area around your room quiet at night?
Q10	During this hospital stay, did you need help from nurses or other hospital staff in getting to the bathroom or in using a bedpan?
Q11	How often did you get help in getting to the bathroom or in using a bedpan as soon as you wanted?
Q12	During this hospital stay, did you need medicine for pain?
Q13	During this hospital stay, how often was your pain well controlled?
Q14	During this hospital stay, how often did the hospital staff do everything they could to help you with your pain?
Q15	During this hospital stay, were you given any medicine that you had not taken before?
Q16	Before giving you any new medicine how often did hospital staff tell you what the medicine was for?
Q17	Before giving you any new medicine how often did hospital staff describe possible side effects in a way you could understand?
Q18	After you left the hospital, did you go directly to your own home, to someone else's home, or to another health facility?
Q19	During this hospital stay, did doctors, nurses or other hospital staff talk with you about whether you would have the help you needed when you left the hospital?
Q20	During this hospital stay, did you get information in writing about what symptoms or health problems to look out for after you left the hospital?
Q21	Using any number from 0 to 10, where 0 is the worst hospital possible and 10 is the best hospital possible, what number would you use to rate this hospital during your stay?
Q22	Would you recommend this hospital to your friends and family?
Q23	During this hospital stay, staff took my preferences and those of my family or caregiver into account in deciding what my health care needs would be when I left?
Q24	When I left the hospital, I had a good understanding of the things I was responsible for in managing my health.

#	Question
Q25	When I left the hospital, I clearly understood the purpose for taking each of my medications.
Q26	During this hospital stay, were you admitted to this hospital through the Emergency Room?
Q27	In general, how would you rate your overall health?
Q28	In general, how would you rate your overall mental or emotional health?
Q29	What is the highest grade or level of school that you have completed?
Q30	Are you of Spanish, Hispanic or Latino origin or descent?
Q31	What is your race? Please choose one or more.
Q32	What language do you mainly speak at home?

Appendix C – Footnote Crosswalk

The footnote numbers below are associated with the Hospital Compare quality measures

Hospital Compare Footnote Values		
#	Text	Definition
1	The number of cases/patients is too few to report.	This footnote is applied when the amount of data for a measure: <ul style="list-style-type: none"> • Does not meet the required minimum amount for public reporting. • Is too small to reliably tell how well a hospital is performing, and/or • To protect personal health information.
2	Data submitted were based on a sample of cases/patients.	This footnote indicates that a hospital chose to submit data for a random sample of its cases/patients while following specific rules for how to select the patients.
3	Results are based on a shorter time period than required.	This footnote indicates that the hospital's results were based on data from less than the maximum possible time period generally used to collect data for a measure. View the Hospital Compare Data Collection Periods for more information.
4	Data suppressed by CMS for one or more quarters.	The results for these measures were excluded for various reasons, such as data inaccuracies.
5	Results are not available for this reporting period.	This footnote is applied when the hospital does not have data to report.
6	Fewer than 100 patients completed the HCAHPS survey. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.	This footnote is applied when the number of completed surveys the hospital or its vendor provided to CMS is less than 100.
7	No cases met the criteria for this measure.	This footnote is applied when a hospital did not have any cases meet the inclusion criteria for a measure.
8	The lower limit of the confidence interval cannot be calculated if the number of observed infections equals zero.	
9	No data are available from the state/territory for this reporting period.	This footnote is applied when: <ul style="list-style-type: none"> • Too few hospitals in a state/territory had data available or • No data was reported for this state/territory.
10	Very few patients were eligible for the HCAHPS survey. The scores shown reflect fewer than 50 completed surveys. Use these scores with caution, as the number of surveys may be too low to reliably assess hospital performance.	This footnote is applied when the number of completed surveys the hospital or its vendor provided to CMS is less than 50.
11	There were discrepancies in the data collection process.	This footnote is applied when there have been deviations from data collection protocols. CMS is working to correct this situation.
12	This measure does not apply to this hospital for this reporting period.	This footnote is applied when: <ul style="list-style-type: none"> • There were zero device days or procedures, • The hospital does not have ICU locations, • The hospital is a new member of the registry and didn't have an opportunity to submit any cases or • The hospital does not report this voluntary measure
13	Results cannot be calculated for this reporting period.	This footnote is applied when: <ul style="list-style-type: none"> • The number of predicted infections is less than 1, or • The number of observed MRSA or Clostridium difficile infections present on admission (community-onset prevalence) was above a pre-determined cut-point.

Hospital Compare Footnote Values

#	Text	Definition
14	The results for this state are combined with nearby states to protect confidentiality.	This footnote is applied when a state has fewer than 10 hospitals in order to protect confidentiality. Results are combined as follows: (1) the District of Columbia and Delaware are combined; (2) Alaska and Washington are combined; (3) North Dakota and South Dakota are combined; and (4) New Hampshire and Vermont are combined. Hospitals located in Maryland and U.S. territories are excluded from the measure calculation.
